

Le Journal des Possibles : Presentation

Corentin : We have created a newspaper « Le Journal des Possibles », which translates as « The Journal of Possibilities ». All students of L'Arbre des Possibles may participate to the Journal, but the project's direction, the writing and the editing are managed by the 12-18 years old.

Zoé : The journal is about green problems, nature, activities that we did, we share some good recipes of veggie sweets from the Papatissiers, learning tips about french or mathematics, science, and creative work from the students of the school.

Yael : I love to make photos. We have a photo workshop where we learn and we make a documentary each month. In march it was about nature.

Lucie : I write about actuality, what happens in the world, like the corona crisis and people who find ideas to help the planet. I also wrote about a lovely river in my village and how to preserve its biodiversity.

Icaro : I love basketball. I wrote an article about my passion.

Yémo : I love fishing. I wrote about green fishing and how to make our own fishing rod.

Zoé : I wrote an article on sharks. It s a long time i'm interested in sharks and their lives.

Lucie : We will publish the journal 4 times a year, one for each season. We published a paper journal for our families, friends, neighbours, locals, other schools from our region and we will propose this year the digital edition for a larger circle in Belgium or french speaking countries.
