

## **Le Re nous v'O, clothes upcycling : Outside presentation**

### **Lucie :**

We have started designing and sewing with recycled old clothes and fabric. Our customers will be the parents, families, neighbors, visitors to our monthly open times and other school events, and the people who will be in the local markets we intend to participate in, such as a Christmas market.

### **Yaël :**

We love sewing and creating, and want to learn to use a sewing machine. We have started with creating bags and puppets last winter of 2021-22 (twenty twenty-one and twenty-two). And we have started selling them in April.

### **Zoé :**

We met Marie from Cabanac. She makes clothes with recycled old clothes. She will come in october and november.

We decided to learn to make dresses. Our theme is dry leaves and autumn colours. We started to draw sketches that you can see here !
